disorder

Meet Dennis

WISH GRANTED, 2020

Childhood is a precious time in life meant for learning, growth, and play. For six-year-old Dennis, those luxuries don't come so easy. Dennis suffers from multiple medical conditions, including a nervous system disorder and other chromosomal disorders. Luckily, Dennis finds joy in the love and support of his family, who do all they can to make him as comfortable as possible.

Dennis' days consist of weekly speech therapy and doctor appointments. Dependent on a ventilator, Dennis has endured multiple procedures to help him breathe and manage his quality of life. After meeting with the wish discovery team, it was apparent Dennis' true wish was to have a multimedia room makeover in his home. If he can't go out into the world and experience life in the same way other children can, he wants to experience it with things he loves like bright colors, lights, movies, and music.

The National Association of Theatre Owners of California/Nevada sponsored Dennis' wish, and it was everything he could have imagined and more. The joy was visible as soon as Dennis saw his new media room, which included a custom chair with a tablet that allows Dennis to control and play games on his new big-screen television! His mom shared that Dennis was so excited and smiling ear-to-ear. With a proper media room equipped with lighting and sensory items just for him, Dennis can fully enjoy his surroundings.
